bowasag

BOWAS AG was originally founded in 1975 as the international marketing instrument for the Bohlen Industrie/WASAG Chemie activities. This is also how the name BOWAS came about.

Although successful in this role, BOWAS AG very quickly moved into more challenging and independent areas of operation.

The combination of a profound knowledge of international markets and the wide range of technology at its disposal, stemming initially from the companies within the group, but later being enhanced through cooperation with a number of reputable partners, has made it possible for BOWAS AG to establish itself as a competent partner for products, technologies, machines and equipment as well as engineering services for the explosives related industries.

We market the following products and services:

Products on behalf of or in cooperation with

WASAG CHEMIE SYTHEN GmbH
in Haltern, Germany

WANO Schwarzpulver GmbH
in Liebenburg, Germany

Nitrochemie Aschau GmbH
in Aschau/Inn, Germany

Nitrochemie Wimmis AG
in Wimmis, Switzerland

Fr. Sobbe GmbH
in Dortmund, Germany

Nitro-Chem S.A. in Bydgoszcz,
Poland

Denel Munitions,
South Africa

Borregaard Industries Ltd.
in Sarpsborg, Norway

Machines and Equipment

Biazzi SA in Montreux,
Switzerland

Denel Munitions,
South Africa

Bellaform

Extrusionstechnik GmbH
in Ingelheim, Germany

Ferrum AG in Rapperswil,
Switzerland

Metzner Maschinenbau GmbH
in Neu-Ulm, Germany

IKA-Werke GmbH Co. KG
in Staufen, Germany

Hermann Linden
Maschinenfabrik GmbH & Co.
KG in Marienheide, Germany

Nitrochemie in Aschau, Germany
and Wimmis, Switzerland
Biazzi SA in Montreux,
Switzerland
Denel Munitions, South Africa
Nigu Chemie GmbH
in Waldkraiburg, Germany
RUAG Ammotec
in Altdorf, Switzerland
ETI Export Inc. in Eagleville USA
and Ontario, Canada
Lenzing Technik, Austria
Plinke in Bad Homburg,
Germany

Our sister company
BOWAS-INDUPLAN CHEMIE
is specialized in

Feasibility studies
Project management
Basic and detail engineering
Procurement, manufacturing,
inspection and shipment of
equipment
Process know-how, transfer of
technology

Supervision, installation, start-up
Training of personnel

in particular in the
following fields

Linters treatment
Nitrocellulose
Nitroguanidine
Acid reconcentration
Waste gas cleaning / Waste
water treatment in explosives
factories
Single-base propellants, solvent
and solventless double-base and
multibase propellants
Ball grain powder
Black powder
Paste and Mastermix
Combustible cartridges
DNT, TNT
NTO
NGL, EGDN, DEGN
PETN
RDX
PBX
Initiating explosives
Filling plants including biscuit
plants
Single machines and technol-
ogy for propellant plants such as
shear roll mill, isostatic blocking,
batch and continuous extrusion,
graining device, cutting machi-
nes, etc.
Rock explosives
Permitted explosives
Safety fuzes
Detonating cords
Disassembly of ammunition
Thermal disposal of explosives
and ammunition
Recycling of explosives and
ammunition
